

Make 3-D Flowers

Materials

- 2 sheets of different colored construction paper
- Glue stick
- Scissors
- Crayons

Instructions

1. Choose which sheet of construction paper will be the petals and cut 4 strips long-ways.

2. Take your glue stick and add some glue to the center of one of the petal strips

3. Place another strip on top of the first strip to make a cross

4. Add more glue in the center of this strip and place another strip on top of it, this time going diagonal.

5. Repeat step 4 with the last strip so that you have a starburst made from your 4 strips
6. Take the two ends of the bottom strip and connect them, forming a loop, and add glue to keep them together

7. Do the same for each petal strip, connecting the ends, one by one with glue, until you have formed a paper ball.

8. Take your glue stick and slide it through one of the openings in order to add glue to the inside, bottom of the ball.

9. Press down on the top of the ball and hold for 20 seconds or more.

10. Once the center is stuck down, color in a center for your flower.

11. The next part is the leaves. Cut two strips from the other color construction paper, again going long-ways.

12. Loop the strip around and glue the tips of the strip together.

13. Do the same with the second leaf.

14. Finally, glue both leaves to the bottom of the flower.
