

Make a Tri Corner Hat

Materials:

- 2-3 sheets of Construction paper
- Stapler/staples (tape can also be used but is less sturdy)
- Tri corner hat template (available on our website)
- Writing utensil
- Scissors

Instructions:

1. Cut out the tri corner hat template

2. With a writing utensil, trace around the template on your construction paper.

3. Cut out the 3 tracings of the tri corner hat template. The curvy part of the template is the top of the hat. The straight edge is the bottom.

4. Number the cut outs 1-3

5. Take the cut outs numbered 1 and 2 and staple one end of cut out 1 to one end of cut out 2

6. Repeat step 5 by stapling on tip of the cut out numbered 3 to the other tip of cut out 2
7. DO NOT STAPLE the tip of cut out 1 to the tip of cut out 3 yet!
8. With these two tips still unconnected, wrap the hat around the wearer's head to measure how big it needs to be.
9. Once you know how tight the hat needs to be, staple the other tip of cut out 1 to the other tip of cut out 3.
