

Make Your Own Bubbles

Materials:

4 cups of warm water

½ cup of sugar

½ cup of dish soap

Pipe cleaner/ string

Directions:

Instructions

1. Take a medium sized bowl and stir the ½ cup of sugar into the 4 cups of water until completely dissolved
2. Stir in the dish soap
3. Fashion a bubble wand out of a craft pipe cleaner, dip it into the solution, and blow bubbles to your heart's content!

No pipe cleaners? You can use a string by tying the ends together so that it forms a circle/ loop. Put the whole string into the solution. The string will stick to itself but gently pull it apart so that the soap expands over the space between the string (it's easier to do this if your hands are soapy too) and blow bubbles through it.
