

Make a Bird Feeder

Materials:

A pinecone

peanut butter (Shortening or lard can be used as well)

Bird seeds (crumbled nuts, breadcrumbs, or cereal/oatmeal are great alternatives!)*

A piece of string

Directions:

1. Take your pinecone and tie a string to one end so that it forms a loop
2. Then cover your pinecone with a generous amount of peanut butter or shortening.
3. Take a bowl or container and fill it with bird seed/ crumbs/cereals
4. Dip your buttered up pinecone into the bowl making sure plenty of seeds/ crumbs are stuck to it
5. Hang your birdfeeder outside on a tree branch and let the birdies feast!

This project may be a bit messy so make sure you do it on a covered surface.

*do NOT use uncooked rice for your bird feeder
