

Spring Wreath

Materials:

- Glue stick
- Paper (tissue or construction)
- Paper plate
- Scissors
- String

Instructions

1. Cut the center out of your paper plate. And poke a small hole into the top.

2. Slide your string through the hole and tie the two ends together in a knot so that you can hang your wreath later.

3. Rip your paper into small pieces (about 1 inch) and crumple them up.

4. Take your glue stick and paste the crumbled paper to your paper plate.

5. Once your paper plate is covered with the paper, you are all done!

6. Feel free to add more decorations to your wreath (check out our instructions for a 3-D flower for a fun decoration idea!).
